

Blood of my blood

On this night, oh the sorrow and pain
In a world without love, what would remain
My story, gone terribly wrong
How can I live, how will I go on

Friends say, "don't be afraid we'll stand by your side
and we'll send our love, on that you can rely"
But what would I give, even my life for just one chance
To say good-bye

Blood of my blood, life from my life

In these arms I held you my son
before we had words to tell of our love
In my mind I look for a thread, something to hold onto
Your clothes on the bed

Friends say, " don't be afraid we'll stand by your side
and we'll send our love, on that you can rely"
but what would I give, even my life, for just one chance
To say good-bye

Blood of my blood
Life from my life

What would I give
What would I give
What would I give
What would I give
